NOTICE—Corrections on original pedigrees are often necessary. If any have been made on this duplicate which do not agree with your private record of the animal's breeding, please return AT ONCE for further changes, so that pedigree may be printed without error. Carefully examine all duplicates to see if owners' names and addresses are correct. This is very important, as much of the writing from which duplicates are made is not very plain. Duplicates are always sent to the person from whom the pedigree is received, unless otherwise ordered.

1. If the animal represented by this Certificate of Registry is sold after being recorded, proper Certificate of Sale must be sent for record before the buyer can record the produce of the animal.
2. This applies to the produce after the sale, and does not concern the produce before the sale.
3. Never, under any circumstances, write the notation of the sale of a recorded animal on the face of a Certificate of Registry. If made on a Certificate of Registry at all, always put it on the back.
4. It is much better to use a Transfer Blank for the purpose of indicating the sale of a recorded animal, but when the Transfer Blanks are not at hand, the Certificate on the back of this duplicate may be used. Transfer Blanks are furnished free.
5. When a Transfer Blank is sent for record, the Certificate of Registry for the animal need not be sent to the office. A Transfer Blank properly signed by the person making the sale, with the fee, if any is required, is all that is necessary.
6. Transfers of sale are free if recorded within three months from the date of sale. After that the fee is 25 cents. A transfer fee does not apply on a pedigree, until after it has been recorded.
