

MONTHLY RAINFALL CHART FOR FIFTY YEARS AT SACRAMENTO
This Chart represents the observations of rainfall in every month for a period of fifty years at the city of Sacramento. The red line drawn from the middle of the seasonal squares represent midnight between the 31st day of December and the 1st day of January in each of the seasons. The rainfall in each month is presented in proportional lines to a scale 1/4 of an inch to each inch of rainfall. The perpendicular lines show proportional rainfall only.
