# SACRAMENTO VALLEY IRRIGATION CO.

## The Kuhn California Project

**T**HIS booklet is the formal announcement of our extensive irrigation project in the Sacramento Valley, California. Here we have found nearly the ideal conditions for the highest success in irrigation—a deep, rich soil, an abundance of water, the California climate and a vast range of crops. We believe it will prove to be the grandest irrigation project ever undertaken. We shall use only the most permanent construction and we assure to every settler a square deal for his investment. We refer with pride to the well-known success of our irrigation projects in the Twin Falls Country, Southern Idaho, where we are irrigating nearly 400,000 acres. We shall aim to surpass in California our previous successes.

J. S. & W. S. Kuhn.
