Especially adapted for California Orchards and Vineyards. The frames and beams are of wrought iron, firmly bolted together, making it strong and light. It has levers so as to easily regulate the depth the plow runs. The bracket frame to which crank axle or furrow wheel is attached is so arranged that it can be easily detached and wheel with its crank axle only, attached to right-hand plow beam and allowed to run on the land and the right-hand plow to run close to a tree or vine.

They were used the last six years in Santa Clara Valley, also in Sonoma and Fresno Counties, and are highly spoken of by those who use them.

For price of Extra Parts see page 121

The Lightest Draft Sulky Plow

Will Sower in any Soil

Actual field scene, showing a one-armed boy doing first-class work with the "Big Injun."

The Beam and Frame of the "Big Injun" Plow is made of cold rolled steel. The Wheels are steel, while the smaller parts are Swedes and malleable iron. The shape of the Mold-board insures complete turning of the furrow with the lightest possible draft. Over 20,000 "Big Injun" Plows are now in use.

For price of Extra Parts, see page 120.
