

## THE GREAT CENTRAL BASIN OF CALIFORNIA

Shown on this map, contains some 25,000,000 acres of the most fertile land in the world. The upper half forms the Sacramento Valley. The City of Los Angeles is in the Southern portion of the map, below the mountain range forming the boundary of the Basin, and in that vicinity has taken place the Southern California development. A mere glance at the map shows the great excess of arable territory in Northern and Central California over Southern California.

TOPOGRAPHICAL MAP  
OF THE  
STATE  
OF  
CALIFORNIA

AND ACCOMPANYING STATISTICS.

Prepared at the request of

His Excellency JAMES H. BUDD,

Governor.

Highway Commissioner
