We furnish only one-year old trees, the California Black, for stock purposes. These trees are grown from hardy nuts raised in the cold Sierras, at an elevation of 3,000 feet. We do not deal in GRAFTED stock, but will contract to graft trees, scientifically, for parties desiring to let out their work. We also deal in Scions, Wax, and Waxed Tape for Grafting and Budding purposes.

We will lay out and plant Walnut Groves of any dimensions, from one acre to a thousand. Our methods are practicable, scientific and expert. In other words

which is Walnut Culture. The best and hardiest stock used, to which is subsequently grafted the finest scions, producing splendid nuts. Write for estimates.

## Scions or Grafts.

for propagating, by grafting into the hardy California Black, we have the following:

Calavette,	Franquette,
Mayette,	Hubbard,
Stocktonian,	Smith's Favorite

These nuts represent the highest types of their kind. Each is supreme in its own field, and, taken as a group, represent all walnut perfection. A letter will bring, by return mail, a booklet fully describing these varieties.

**MR. E. M. PRICE**, of the Anderson-Price Nurseries, is a Walnut Expert of over twenty years of successful experience. He has put the sum of his varied knowledge into a comprehensive treatise, entitled

## "The Walnut"

This book is invaluable to every grower of fruit trees, whether he be interested in Walnut Culture, or not. Because the simple, easily understood directions for grafting are equally applicable to the Peach, Apple, Orange, Lemon, Plum, Pear, or any other fruit trees.

The methods prescribed by Mr. Price are the latest, the most successful, and by all odds the most scientific. Its success is proved by actual practice.

**Over Ninety Per Cent. of the Cases Have Succeeded.**

Make money following the Walnut Book. Every phase of the process of grafting, every detail in the matter of growing, is plainly set forth, and profusely illustrated by photographs, so that the beginner simply CANNOT go wrong.
