

# What Does This Picture Tell You?

Study it closely.

Note the Liberty Iron Works—the business buildings on Del Paso Boulevard—the many homes in the surrounding district.

**All of this splendid development is not there—YET.**

**But—the Liberty Iron Works with an \$18,000,000 Government airplane contract is a reality and operating; four more business buildings are under construction on Del Paso Boulevard and many modern homes are built and building.**

It is difficult to estimate the tremendous effect the Liberty Iron Works will have on North Sacramento. Its employees will number into the thousands—its payroll will approximate \$3,000,000 annually. And the Liberty Iron Works is here to stay—irrespective of the duration of the war. Its manufacturing possibilities are unlimited.

**North Sacramento, already the largest community in Sacramento County outside of Sacramento City, is certain to be developed in a phenomenally short time to an even greater degree than the artist has pictured above.**

Now—look again at this picture. Within less than 2 blocks of the Liberty Iron Works and in that section where the home development is indicated and where homes are now being built, you can buy a big 50-ft. lot for the surprisingly small sum of \$500 and for as little as \$10 monthly.
